

Project Design Phase Proposed Solution Template

Date	23 September 2026
Team ID	
Project Name	Online Complaint Registration
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Need to bridge the gap between citizens and civic authorities with a secure, centralized, and efficient complaint management system.
2	Idea / Solution description	CivicCare is a full-stack MERN platform that allows citizens to register and track complaints while administrators and agents manage, assign, and resolve them.
3	Novelty / Uniqueness	Role-based dashboards with JWT authentication, centralized complaint management, agent assignment, priority handling, and real-time status tracking.
4	Social Impact / Customer Satisfaction	Improves transparency in civic complaint handling, enables easy tracking, and helps authorities manage and resolve complaints efficiently.
5	Business Model (Revenue Model)	Can be provided as a digital civic management service for municipalities, local authorities, or organizations through subscription or service-based models.
6	Scalability of the Solution	MERN-based architecture supports adding more users, agents, complaints, and administrative features while allowing the system to scale for larger civic organizations.
