

Project Design Phase Solution Architecture

Date	23 September 2026
Team ID	
Project Name	Online Complaint Registration
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a structured process that bridges the gap between civic problems and technology solutions. Its goals are to:

- Find the appropriate technology solution to address problems in civic complaint registration, management, and tracking.
- Describe the structure, components, and workflow of CivicCare for project stakeholders.
- Define the features, system requirements, and development components such as authentication, complaint management, role-based access, and dashboards.
- Provide specifications for implementing, managing, and maintaining the CivicCare system using React, Node.js, Express, and MongoDB.

Example - Solution Architecture Diagram:
