

Data Flow Diagram Architectural Visuals

Date	23 September 2026
Team ID	
Project Name	Online Complaint Registration
Maximum Marks	4 Marks

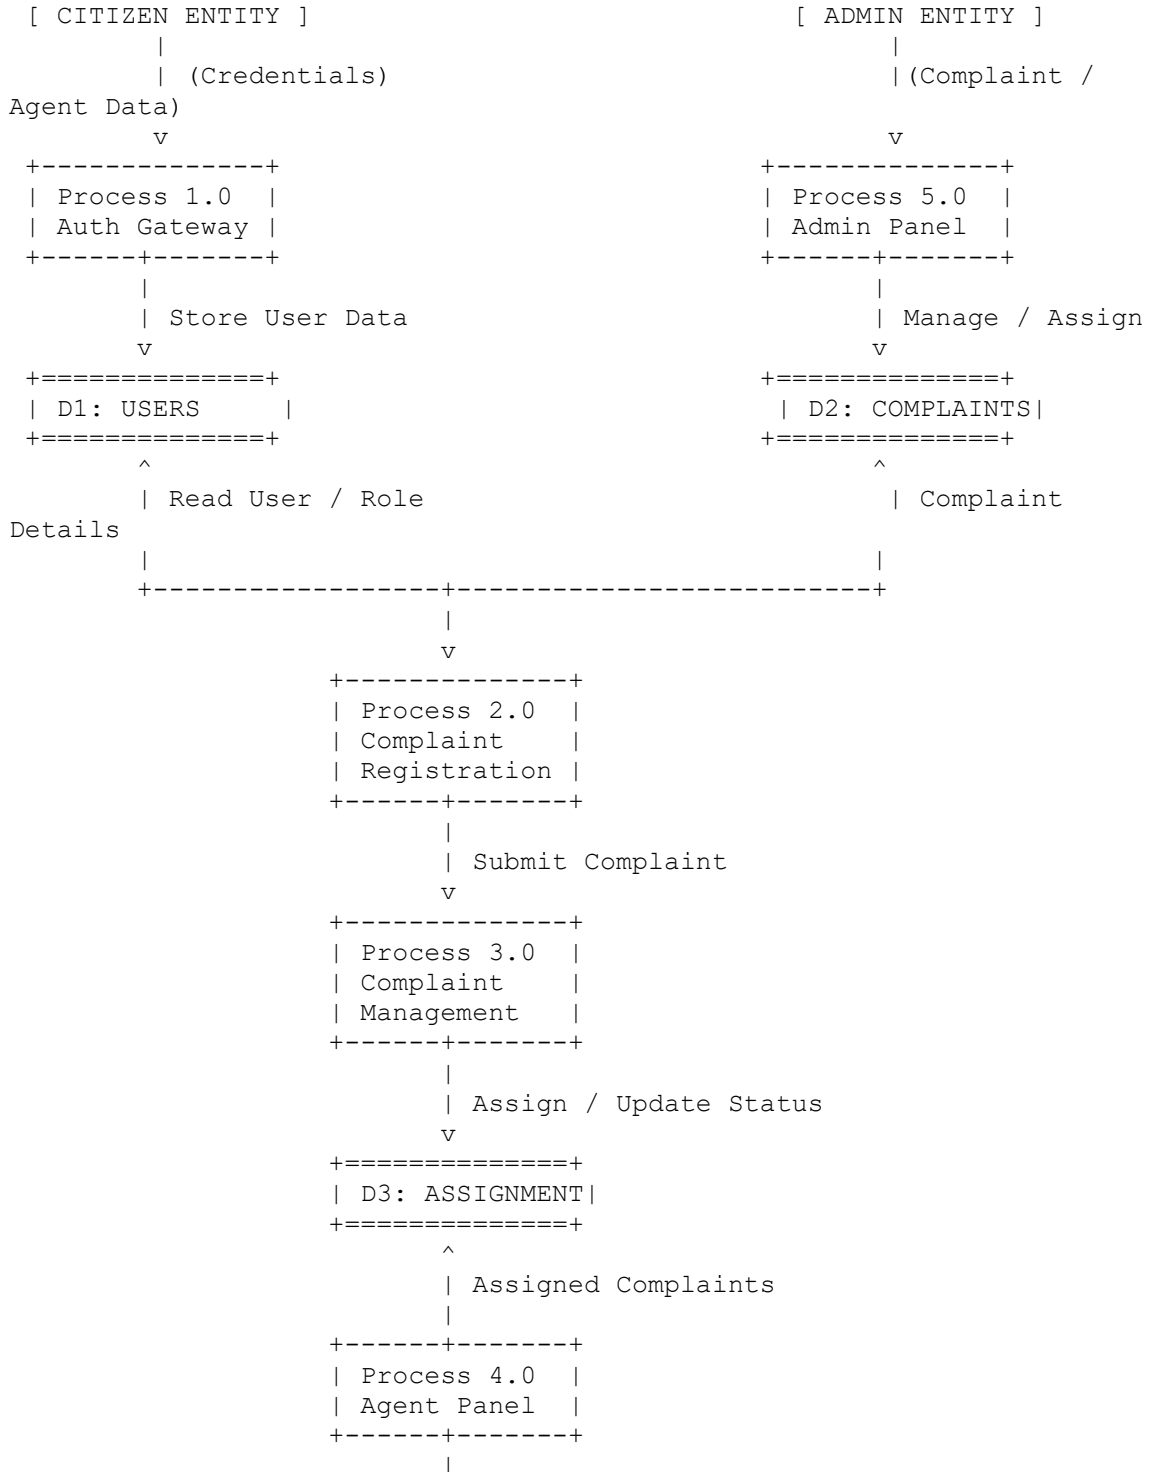

1. DFD Level 0: Context Diagram Diagrammatic Flow

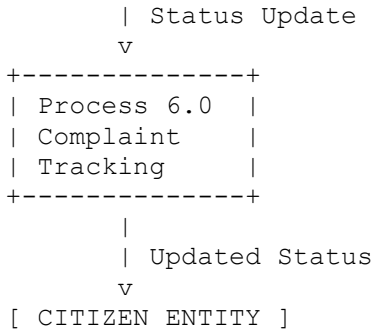

The Context Diagram maps the overall interaction between **CivicCare** and its main users, defining the inputs and outputs of the system.

2. DFD Level 1: Operational Component Pipeline

The Level 1 DFD represents the major operational workflows of the **CivicCare MERN application**, including authentication, complaint management, assignment, and status tracking.

3. Data Flow Diagram Entity and Process Dictionary

Element Identifier	Typology	Description & System Interactivity	Technology Mappings
Citizen	External Entity	Registers, logs in, submits complaints, and tracks complaint status.	React Frontend
Admin	External Entity	Views complaints, creates agents, assigns complaints, and manages complaint details.	Admin Dashboard
Agent	External Entity	Views assigned complaints and updates complaint status.	Agent Dashboard
Process 1.0	System Process	Handles user registration, login, JWT authentication, and role-based access.	Node.js, Express, JWT
Process 2.0	System Process	Handles complaint registration with category, location, priority, and description.	Express REST APIs

Process 3.0	System Process	Manages complaint viewing, assignment, priority, and status updates.	Node.js, Express
Process 4.0	System Process	Provides agents with assigned complaints and allows status updates.	React, Express APIs
Process 5.0	System Process	Provides administrators with complaint and agent management features.	Admin Protected Routes
D1: Users	Data Store	Stores user profiles, credentials, and assigned roles.	MongoDB, Mongoose
D2: Complaints	Data Store	Stores complaint details, category, location, priority, status, and user information.	MongoDB, Mongoose
D3: Assignments	Data Store	Stores complaint-agent assignment information for complaint handling.	MongoDB, Mongoose
